

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

1. **(currently amended):** A double-sided pressure-sensitive adhesive sheet to be used in sticking and fixing a touch panel to a display surface of a display device, one surface of the double-sided pressure-sensitive adhesive sheet is capable of being stuck-adhered substantially entirely on the touch panel, and the other surface is capable of being stuck-adhered substantially entirely on the display surface of the display device, wherein the double-sided pressure-sensitive adhesive sheet has at least two pressure-sensitive adhesive layers but does not have a substrate, is constructed such that it is repeatedly peelable against at least one surface of the touch panel and the display surface of the display device, and has optical isotropy; and wherein the double-sided pressure-sensitive adhesive sheet has a thickness of not more than 50 µm,

wherein at least one pressure-sensitive adhesive layer of the pressure-sensitive adhesive layers of both outer sides has a 180°-peeling adhesive strength (to a glass plate or a triacetyl cellulose film at a peeling rate of 300 mm/min at 23°C) of not more than 5.0 N/20 mm and  
wherein the respective pressure-sensitive adhesive layers each comprise an acrylic polymer containing a (meth)acrylic acid alkyl ester in which the alkyl moiety thereof has from 1 to 18 carbon atoms as the major monomer component, and the major monomer for the respective pressure-sensitive adhesive layers is constituted from the same kind of monomer and the proportion of the major monomer component constituting each pressure-sensitive adhesive layer is 80% by weight or more based on the whole amount of the monomer components.

2. **(currently amended):** The double-sided pressure-sensitive adhesive sheet according to claim 1, which has from ~~two~~three to five pressure-sensitive adhesive layers.
3. **(canceled).**
4. **(canceled).**
5. **(original):** The double-sided pressure-sensitive adhesive sheet according to claim 1, which is used for fixing a display device to a touch panel in the inner touch panel system.
6. **(currently amended):** A touch panel-provided display device, wherein a display device and a touch panel are fixed to each other via the double-sided pressure-sensitive adhesive sheet according to any one of claims 1, 2[[, 4]] and 5.
